Number of different pupils registered during the year 1921-1922 was 277.

Number in the Senior High School, 50.

Number in the Junior High School, 23.

Number in the Elementary Schools, 204.

Average daily attendance, 225.

Percent. of attendance, 89%.

Total enrollment September 30, 1922, 276.

Number of regular teachers now employed, 16.

12 Elementary Schools have been regularly in session.

With one exception the teachers have had previous experience. This is a distinct advantage, one I hope will be maintained. Permanency in the teaching force means more than any one thing for efficiency and real progress in our schools.

THE AIMS OF EDUCATION

The general aim of education is to train all the children in those qualities of life and character which will make them good and efficient citizens of the community, state and nation.

The specific aims are to develop in each child, first; the ability to earn his living; second, willingness to contribute to the welfare of others; third, knowledge of how to use his leisure; fourth, knowledge of how to care for his health. All the efforts of those concerned should be directed toward the attainment of these aims.

SCHOOL BUILDINGS

With three exceptions, the school buildings are in good repair and sufficient in furnishings to meet the needs of the

different sections. The Hatfield, Emerson Hill and Tyler buildings will need minor repairs during the vacation.

The first and second grade room at Contoocook is not large enough to accommodate both grades at the same time. The present plan of giving the first and second grades one session each per day, will not prove satisfactory, as a matter of permanent policy. It can be shown that two shorter sessions for beginners are preferable to one long.

I am pleased to report that, in spite of the difficulties, the first and second grades are doing very good work. I earnestly hope that some plan may be devised to relieve this situation before the opening of another school year.

THE HIGH SCHOOL

The necessity of a High School education is now generally recognized by all classes. The only question in the minds of thinking people is, "What sort of an education shall it be?" The answer is, "One that shall meet the needs of the young people of the community in which the High School is located." To a large extent the Hopkinton High School fulfills these demands.

The building, however, is not adequate for the requirements of the present school. Increased laboratory facilities for science work, an assembly hall and additional class rooms are among the things that should be supplied if the High School work is to continue with unimpaired efficiency.

The recent purchase of new furniture and laboratory material has been greatly appreciated by both teachers and pupils.

In closing, I wish to express my appreciation of the fine spirit of loyal cooperation of teachers, of the School Board and of the Community. It has been, and is a real pleasure to serve with you in the training of children entrusted to our care.

Respectfully submitted,

GAIUS H. BARRETT, Supt. of Schools.
